Alabama Pediatric Dental Associates & Orthodontics

Huntsville, AL

This new facility for Alabama Pediatric Associates is a 11,000 square foot office consisting of reception, children's and visitors play area, business offices, treatment rooms, orthodontics working bay, labs & break rooms. While the scale and character of this building blend nicely within the context of the neighborhood, it also has a unique presence utilizing the Arts and Crafts style with ponderosa-style shutters, as well as a stacked stone and tumbled brick veneer. The interior of the facility is a study in contrasts. Alabama Pediatric Dental Associates has long utilized Huntsville's relationship with the space industry as the basis for their interior design. Hence, the clean lines of the "Flight Deck" (reception area) to the galactic hallways to the numerous models of NASA spacecraft, all incorporate a historical connection to our city while providing a fun atmosphere for children.
