# Alabama Pediatric Dental Associates & Orthodontics

Madison, AL

This new facility for Alabama Pediatric Associates is a 10,385 square foot office consisting of reception, children's play area, business offices, treatment rooms, orthodontics working bay, labs & break room. While the scale and character of this building blend nicely within the context of the neighborhood, it also has a unique presence utilizing the Arts and Crafts style with ponderosa-style shutters, as well as stacked stone and tumbled brick veneer. The interior of the facility is a study in contrasts. APDA has long utilized Huntsville's relationship with the space industry as the basis of their interior design. Hence the clean lines of the "Flight Deck" (reception) and space age game and play areas, all incorporate a historical connection to our city a fun atmosphere for children.
