63 guest rooms
\$3.8 million
completion date fall 2009

Country Inn & Suites

Madison, AL

Madison Alabama is a growing community adjacent to Huntsville and Redstone Arsenal and NASA's Marshall Space Flight Center. I-565 is an active corridor that connects these areas and is an excellent place to provide transient lodging for patrons of all of these areas. Working from a corporate prototype design, OAA designed a site specific hotel to match the needs of the owner/developer. OAA was also responsible to coordinate the requirements of the franchisor's (Country Inns & Suites) standards and specifications creating a warm and unique environment. The hotel includes boardroom facilities, an indoor pool, exercise room, guest laundry facilities as well as 63 guest rooms and administrative offices.
