## Beacon Ridge Professional Center Madison, AL

The building will be a multiple tenant building and will include a variety of uses. The concept for the design is a warm, human-scale building that is inviting to the customers and clients that use the building. Exposed timber trusses, wood decking and stone veneer reflect the Craftsman style of architecture, while the interior of each suite will be tailored to each tenant's needs. Fashioning each suite to fit the client, style ranges from traditional to contemporary.
