Completed 2005

Redstone Federal Credit Union Huntsville, AL

This project is a major renovation of a 1960's building originally built for a defense contractor in Research Park. Redstone Federal Credit Union had recently built a new Main Branch and needed to renovate the existing 100,000 SF building adjacent to the new branch. The existing building renovation includes a new operations center, customer service, training center, records management, print services and central computer/IT center.
